

QUALITY POLICY

Aero Tec Laboratories Ltd (ATL) is dedicated to quality and continual improvement for both our customers and employees. Our responsibility is to ensure that through established standards and measurement of our performance against these, the level of quality, service and delivery we provide always meets, and aims to exceed, our customers' expectations.

ATL develops quality awareness through continual process improvement, training, measurement and employee development. ATL's quality objectives are:

- Deliver a quality product on time every time – through adherence to established and audited procedures.
- Reduce non-conformance – through internal continual improvement and external Supplier Development. Our attitude is "right first time".
- Reduce manufacturing costs and pass savings through to our customers – internally through improved efficiency throughout the company and externally through Supplier Development.
- Continual development of products and new technology to support ATL's diversification goals.
- A proactive focus on knowledge and technology transfer, driven through Sales and Marketing to fuel business growth in new industries as well as sustain established market share.

ATL's Quality Management System has been developed in line with ISO9001:2015 and is continually assessed against the standard through both internal audits and management review including reviewing all corrective and preventative action. A culture of continual improvement, considering risks and all interested parties, is promoted throughout the business.
